

Research Project: Knowledge-based Language Models

[WELCOME](#)[HIRING!](#)[TEAM](#)[PUBLICATIONS](#)

We are hiring PhD students!

We are hiring 3 PhD students, starting from September 2024 or later to work on teaching language models with structured data! We work in the [DIG team](#) at [Telecom Paris](#), one of the finest engineering schools in France, and part of [Institute Polytechnique de Paris](#) — ranked [38th in the world](#) by the QS ranking. The institute is 45 min away from Paris by public transport, and located in the green of the Plateau de Saclay.

Excited about joining us ? Tick these boxes:

1. Have a good background in natural language processing, machine learning, and knowledge representation
2. Have a master's degree (or equivalent)
3. Be of European nationality
(imposed by our sponsor, the French Ministry of Armed Forces)

Then submit (1) a motivation letter, (2) a CV, and (3) the transcript of your grades in a ZIP-file that carries your name [here!](#)

Project in collaboration with:
