

Tenure-track Assistant Professor in Artificial Intelligence and Decision Mathematics

The [Department of Mathematics and Statistics](#) at Toulouse School of Economics (TSE) has an opening for a tenure-track Assistant Professor position beginning September 1, 2026.

The search is for a researcher in the mathematics/statistics/computer science of AI with an interest in applications to economics and the social sciences.

TSE offers an exceptional professional and scientific environment to achieve tenure such as :

- reduced teaching hours, competitive salary,
- high-quality scientific environment in Toulouse,
- strong interaction with the prominent Department of Economics,
- member of the [Artificial and Natural Intelligence Toulouse Institute](#)
- very pleasant working conditions in a major city in south of France, new building in the city center.

Applicants must have a Ph.D. (expected completion by June 30, 2026 acceptable) and show outstanding potential and achievement in research, as well as excellent teaching skills. For full consideration, candidates should submit by **November 21, 2025** the following package :

- cover letter,
- curriculum vitae,
- statements on research (with links to the publications and preprints and a scientific project for the coming years) and teaching,
- ask three references to send their letters by November 21, 2025.

Online interviews will take place between December 8 2025 and January 9 2026, visits to TSE will be organized just after.

✉ Questions, application, and reference letters should be sent to recruitment-math-junior@tse-fr.eu.
